
Wireless Bluetooth GPS Receiver & Smart ST™ Professional
Navigation software solution for Pocket PCs

GPS 4400 Wireless

Ultimate in-car GPS navigation. No strings attached. The new Navman GPS 4400 is a complete wireless GPS navigation system for any Bluetooth embedded Pocket PCs.

With wireless connectivity, the GPS receiver unit can be placed out of the way, on the rear winshield for example, freeing the Pocket PC and dashboard of wires and cables and allowing greater flexibility of use whilst driving.

In addition, the GPS receiver unit can be attached with a lanyard or armband, both of which are supplied as standard, making the GPS 4400 mobile, versatile and easy to install whatever the circumstances.

Mobile Works in or out of the car.	Languages English, French, German, Dutch, Spanish, Italian.
Design To fit all Pocket PC's with integrated Bluetooth support	Safe Finger controlled touch screen menu system for easy mobile use, with additional controls via the Pocket PC hardware keys.
Voice Male and female, turn-by-turn voice instructions.	Style Day and night screen display with multiple map style options.

Power
Three AAA Batteries (included).
10 to 30 hours of continuous operation.

External Power
12.0 V DC cigarette lighter vehicle power cable.

Drive safely and enjoy the ride. The Navman GPS 4400 gives you precise, vocal turn by turn, instructions throughout your journey. It indicates which lane to get into when approaching difficult intersections, such as motorway entrances and large roundabouts.

No small maps to read. No hard signs to find. Just listen.

GPS 4400

Wireless

technical specifications

Instruction list

Enjoy Europe. The Navman GPS 4400 comes complete with road and street level maps of no less than sixteen major Western European countries. Its unique new Map Management feature allows you to load only those maps which are relevant to your current journey, freeing your Pocket PC's memory for other use and providing faster searching and routing.

Combine this with its unique door to door routing, its automatic map-stitching and Back-on-Track™ features, and you have the means to easily and efficiently find your way in the most remote part of any European country.
